Your code

```
1   from flask import flash, render_template, request, redirect, session, url_for
2   from werkzeug.security import generate_password_hash, check_password_hash
3   from appdir import app, db, mongo
4   from appdir.models import Name, Category, Users
5   import string
6
7   a_z = string.ascii_uppercase
8
9
10  def check_user_level():
11      """
12      Checks whether the logged-in user is a superuser and returns the result
13      via a boolean value.
14      """
15      current_user = Users.query.filter(Users.user_name == session["user"])
```
